Personal Statement

Front-end developer with 3+ years of experience in the FinTech sector. Passionate about clean, maintainable code and collaborating with UX to ship production features, I have engineered multiple digital wealth-management web apps for 100k+ users.

Core Skills

Front-end: React, TypeScript, JavaScript, HTML5, CSS3/SASS, Bootstrap

Back-end (support): Node.js, Express.js, PostgreSQL, MySQL, Ruby on Rails

Experience

Front-End Developer - InvestCloud Inc.

London • Nov 2022 – Present

- Developed digital wealth management portals for high-profile clients including HSBC, UBS Monaco and Rathbones
- Integrated a proprietary UI component with React SDK to standardize styles and accelerate development by 30%.
- Built reusable UI components and integrated RESTful APIs for financial data platforms
- Boosted HSBC portal accessibility score from 24 to 98 by applying semantic HTML, ARIA roles, and keyboard navigation.
- Supported production launches by coordinating with dev, QA, and ops for zero-bug releases.
- Mentored two junior developers; instituted a peer-review checklist that raised PR acceptance rate to 95%.

Freelance Web Developer

Remote • Jun 2022 – Oct 2023

- Designed and deployed 10+ single-page marketing sites via Fiverr.
 - Configured Heroku hosting, DNS, SSL and set up CI/CD pipelines—ensured 99.9% uptime.
 - Worked directly with clients to gather requirements, customize layouts, and ensure responsive, accessible design
-

Education

Le Wagon Coding Bootcamp – Full-Stack Web Development

2022

BSc Computer Science (Level-4 Cert completed), University of London

2023–2025

Personal Projects

Personal Portfolio

- Developed and designed a personal portfolio website with React, JavaScript and Bootstrap/SASS to showcase my works.

Movie Explorer

- A React app that fetches and displays popular movies using the TMDB API. Users can search for movies and save their favorites locally. Tech Stack: React (Hooks), React Router, JavaScript, CSS.

P5 Game

- A simple game project I built using p5.js. It's a platform-style game designed to experiment with basic game mechanics, asset handling, and interactivity in JavaScript.
